

# The Green List: Simplified applications and residence pathways

The Green List will make it easier for employers to hire and attract migrants for specified high-skilled, hard-to-fill occupations, with guaranteed residence pathways for eligible people.

The Green List only contains a small number of highly skilled roles that have been identified as being in high demand globally and in ongoing shortage in New Zealand.

These roles will have registration, qualification or experience requirements, and more detail on these is available on the Immigration New Zealand website.

Employers won't need to provide proof of advertising for these occupations when progressing an accredited employer work visa job check application.

Eligible migrants working in these occupations will have clear pathways to residence, either through a direct to residence application or after working for in New Zealand depending on the role. Their partners will have open work rights. Both residence pathways will be limited to migrants 55 years or younger which is aligned with the Skilled Migrant Category requirements.

The Green List is about making it easier to attract globally in-demand workers, but it is not the only pathway to residence available. Other employers will still be able to access skilled migrants, and many of them will also have a pathway to residence through the Skilled Migrant Category.

## The Fast Tracked 'Straight to Residence' pathway

Eligible migrants employed in these occupations can come to New Zealand on a work visa from 4 July and apply for residence from September 2022. From September residence can also be applied for directly from offshore. Minimum salary requirements apply where specified, and these will be indexed to the median wage and change over time.

## The Work to Residence pathway

Eligible migrants in these occupations can apply for residence after two years:

Anaesthetic Technician  
Medical Laboratory Technician  
Medical Imaging Technologist  
Medical Radiation Therapist  
Occupational Therapist  
Sonographer  
Podiatrist  
Audiologist  
All Registered Nurses (including but not  
limited to Aged Care)

Midwife  
Teachers - Secondary with specialisations and  
registered ECE  
Automotive Electrician  
Diesel Motor Mechanic (including Heavy  
Vehicle Inspector)  
Electrician (General) –registered  
Plumber – registered  
Dairy Farm Managers

Migrants paid at least twice the median wage in other roles can also apply for residence after two years.

## Questions and Answers

### Is the Green List the same as the current skills shortage lists?

The Green List is shorter and more focussed than the Regional Skills Shortage List. Many (but not all) of the roles on the Long-Term Skills Shortage List are on the Green List.

### **How do these changes relate to other residence pathways?**

The Green List provides two pathways for residence – a fast track or work to residence path. There is also a pathway to Eligible migrants working in these occupations or who are paid twice the median wage will have clear pathways to residence.

A review is underway of the Skilled Migrant Category. This pathway will be reopened later in 2022 after applications for the 2021 Resident Visa close on 31 July.

### **What will happen to the existing skills shortage lists (the Long-Term Skill Shortage List, Regional Skills Shortage List, and Constructions and Infrastructure Skill Shortage List)?**

The existing skills shortage lists will be replaced by the new Green List. This means any roles that are currently on a skills shortage list, but not on the Green List won't be exempt from a labour market test unless they pay at least 200% of the median wage.
